Max Marks: 3 Marks

Brainstorming & Idea Prioritization Template

This document details the ideation phase for developing **LaunchPad AI** (a Generative AI platform for evaluating business concepts before implementation). It demonstrates how various platform features and modules were proposed, grouped, and prioritized based on technical feasibility and business importance.

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Shilpa Kumari	Automated viability scoring engine to analyze foundational idea inputs quickly.	Core AI Engine	G1
2	Shilpa Kumari	AI-powered SWOT framework generation mapping out critical platform risk areas.	Core AI Engine	G1
3	Chanchal Patni	Real-time competitive landscape reporting and automated strategic differentiation cards.	Market Intelligence	G2
4	Shilpa Kumari	Dynamic interactive dashboard containing responsive report formats and loading trackers.	Frontend UI / UX	G3
5	Shilpa Kumari	Secure .env key validation workflow avoiding direct token visibility or misuse.	Security Layer	G4
6	Shilpa Kumari	Public web accessibility deployment mapping local Flask application states to secure Ngrok pipelines.	DevOps / Deployment	G5

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility	Importance	Selected (Yes/No)
G1	LaunchPad AI Core: Viability scores and automated SWOT analysis generators via Gemini 1.5 Flash.	High	High	Yes

Group No.	Final Idea	Feasibility	Importance	Selected (Yes/No)
G2	Market & Competitor Analyzer: Strategic insight dashboards highlighting differentiation targets.	High	High	Yes
G3	Dynamic UX Suite: Multi-device fluid report interfaces with responsive visual states.	High	High	Yes
G4	Encrypted Token Handler: Automated Flask input-filter security layer.	High	Medium	Yes
G5	Ngrok Tunnel Integration: Zero-overhead fast deployment mechanism for quick evaluations.	High	High	Yes
