

Project Name:	LaunchPad AI	Team Members:	Chanchal Patni, Shilpa Kumari
Max Marks:	3 Marks		

Project Initialization and Planning Phase

DEFINE PROBLEM STATEMENTS (CUSTOMER PROBLEM STATEMENT TEMPLATE)

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)		I'm trying to...	But...	Because...	Which makes me feel...
PS-1	An early-stage entrepreneur / startup founder	Validate a new business idea and generate complete viability reports before investing capital.	Manual market and SWOT analysis takes weeks and costs significant consultant fees.	I lack quick access to centralized data intelligence and generative business logic models.	Anxious, overwhelmed, and hesitant to launch.
PS-2	A student innovator / startup enthusiast	Evaluate multiple business concepts rapidly for an academic pitch or incubation program.	Existing analysis platforms do not offer structured, real-time Gemini AI-driven insights.	The development tools are separate, unintegrated, or overly complex to set up.	Stuck and uninspired to prototype.
