

Project Demo Planning Template

LaunchPad AI — Project Documentation

Flow of the final LaunchPad AI demo, timed to run smoothly within roughly 12 minutes.

S. No	Module / Feature to be Demonstrated	What will be Shown	Demonstrated By	Time Allotted (mins)
1	Dashboard & Input Form	Live walkthrough of the startup input form (name, description, audience, business model) with real-time character counters	Project Owner	2
2	AI Analysis Generation	Submitting a live request and showing the "Analyzing..." spinner state while Gemini 1.5 Flash processes it	Project Owner	2
3	Startup Analytics & SWOT Results	Viability and Innovation score cards, plus the four-quadrant SWOT report rendering dynamically	Project Owner	3
4	Recommendations Card	AI-generated market insights and growth strategy text	Project Owner	2
5	Report History & Live Public URL	Reviewing a previously saved report from history, and showing the app is reachable via the public Ngrok URL	Project Owner	3
Total Demo Duration				12

Demo Logistics

Demo Platform / Tool	Live browser demo of the Flask app via the public Ngrok URL, with localhost:5000 as a fallback
Demo Date & Time	To be scheduled with mentor / evaluator
Recording / Demo Video Link	Demo recording available (captured on-device); upload to Drive/YouTube and paste the share link here
Backup Plan (in case of technical issues)	If the Ngrok tunnel drops, fall back to running the app locally on the presenter's machine (127.0.0.1:5000); a pre-recorded demo video is also available as a last resort

Appendix: What the Demo Will Show (Live Screenshots)

Actual output from LaunchPad AI, captured during testing with a sample startup, "Diet Plan AI" (an AI-powered personalized nutrition planning app).

1. Input form

The screenshot shows the 'Describe Your Startup' form in the LaunchPad AI interface. The form includes fields for Startup Name, Target Audience, Description, and Business Model. The 'Startup Name' field contains 'Diet Plan Ai' (12 / 2000 characters). The 'Target Audience' field contains 'students elder, people and adults , busy professionals' (55 / 2000 characters). The 'Description' field contains 'ai powered platform that generates personalized daily nutrition plan based on user health and lifestyle goal.' (109 / 2000 characters). The 'Business Model' field contains 'provide basic diet planning for free but charge for pro features' (65 / 2000 characters). Below the form is an 'Analyzing...' button and a 'Processing your analysis...' status indicator.

The completed input form for the "Diet Plan AI" example before submission.

2. Startup Analytics & SWOT Report

The screenshot shows the 'Startup Analytics & SWOT Report' page. At the top, there are two scores: a '55 VIABILITY SCORE' and a '42 INNOVATION SCORE'. Below these scores is a 'SWOT Report' section. The 'SWOT Report' is divided into four quadrants: Strengths, Weaknesses, Opportunities, and Threats. The 'Strengths' quadrant lists three points: 'Low marginal cost of generating personalized plans using automated AI models.', 'Freemium model lowers the initial barrier to user acquisition.', and 'Addresses a universal, high-interest consumer need for health and nutrition.' The 'Weaknesses' quadrant lists three points: 'Extremely low differentiation in a highly saturated market crowded with existing fitness apps.', 'Targeting too broad of an audience (students to elderly) dilutes product focus and UX design.', and 'High risk of user churn once initial novelty wears off or if weight goals are not met immediately.' The 'Opportunities' quadrant lists three points: 'Integration with wearable IoT devices (Fitbit, Apple Watch) to ingest real-time biometric data.', 'Partnerships with grocery delivery APIs (like Instacart) to monetize meal-prep ingredient fulfillment.', and 'Niche positioning focusing strictly on medical-adjacent diets (e.g., diabetic, renal, or gluten-free).'. The 'Threats' quadrant lists three points: 'Heavy competition from established giants (MyFitnessPal, Noom) and generalist LLMs like ChatGPT.', 'Potential legal liability regarding inaccurate or unsafe nutritional advice generated by AI.', and 'High customer acquisition costs (CAC) in the competitive health and wellness digital ad space.' Below the SWOT Report is a 'Recommendations' section.

Viability score of 55 and Innovation score of 42, with the full four-quadrant SWOT breakdown.

3. Recommendations

AI-generated Market Insights and Growth Strategy for the same example.
