

Functional Features Included in the Solution

Comprehensive list of features successfully integrated into LaunchPad AI

Project Name	LaunchPad AI
Maximum Marks	5 Marks

This list gives evaluators a clear view of the scope of LaunchPad AI, the modules developed, and the exact capabilities the application provides to end users.

S.N o	Feature Name	Description & Purpose	Module / Layer	Status
1	Startup Input Form	Captures name, description, target audience, and business model with a 2,000-character limit	Frontend	● Completed
2	Server-side Input Validation	Rejects empty or oversized fields before calling the AI	Backend	● Completed
3	AI-Powered Startup Analysis	Calls Gemini 1.5 Flash to generate viability and innovation scores	AI Engine	● Completed
4	SWOT Report Generation	Structured strengths / weaknesses / opportunities / threats output	AI Engine	● Completed
5	Market Insights & Growth Strategy	AI-generated actionable recommendations	AI Engine	● Completed
6	Dynamic Result Rendering	Async fetch with no page reload; results shown across three separate cards	Frontend	● Completed
7	Report Persistence	Saves each analysis to a local SQLite database	Backend	● Completed
8	Report History	Lists and reloads past reports on demand	Backend / Frontend	● Completed
9	Public Deployment Tunnel	Auto-launches an Ngrok tunnel and prints the public URL on startup	Backend	● Completed
